

CURBS

to be positioned on Y-beams

100% CUSTOMISABLE SIZES AND FINISHES ✓

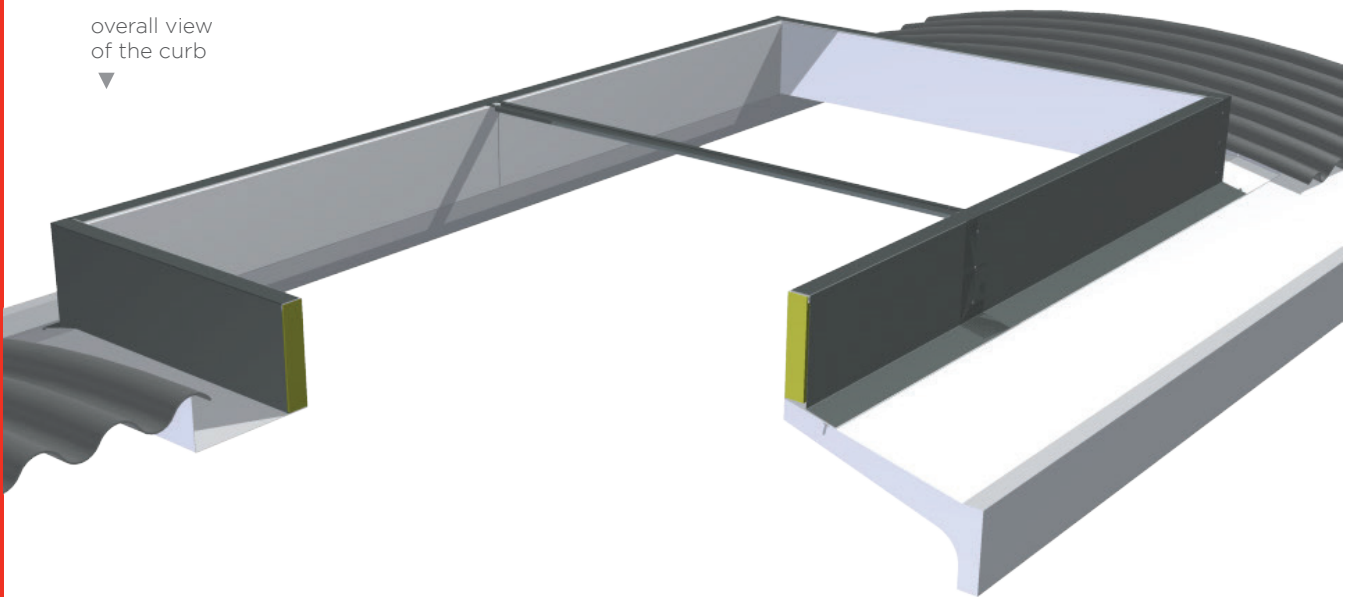

WITH 2 SIDES RADIATED FOR A PERFECT FIT TO THE COVER ✓

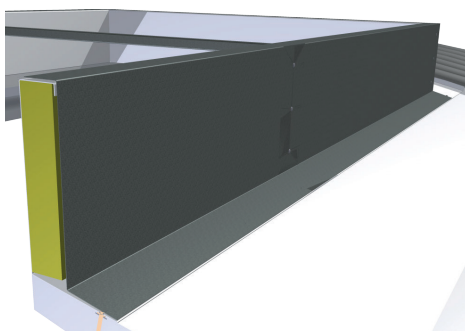

Curbs, to be assembled on-site, for coupling with curved sheets of fiber-cement or corrugated metal. Made of steel sheet with chromatic finishes, the height and polyurethane insulation panel can be customised according to project requirements. Designed in 3D, it consists of two sides with a C-shaped configuration for support on the beam and two channel sides with a radiated wall for coupling to the curved sheets.

The curb, to be assembled on-site, ensures optimized packaging and transportation. Fittings and step-by-step assembly instructions are always included.
